About UK Short Courses

In Rugby School and St Paul’s School, UK Short Courses offers the chance to stay at world-renowned educational institutions - with courses that focus on authentic input and relevant, high quality real-world experiences.

We run 3 course streams to cater for the differing priorities and interests of our students, and whichever course is chosen, an inspiring educational experience awaits, with premium facilities, focussed small classes and a history of excellence built on the traditions and values of our schools.

“We want all of our students to take away something meaningful and tangible from our courses. The learning experience, expanded knowledge and certificate they obtain are of course part of this. However, just as important are the character education, confidence gains and international team spirit nurtured amongst closely bonded classmates.”

Career | Subject interest | EAL

For Career Stream courses, we partner with expert tutors and partners in specific fields to ensure the highest quality of tuition and relevant practice-linked experiences. Our Subject Stream courses utilise Rugby School teachers as part of their identity, and our English as an Additional Language (EAL) courses, combine high intensity classroom coaching with frequent real-world visits and excursions to explore and immerse students in UK culture. Smaller classes (Max 15) and academically focussed students help teachers and tutors get to know their students well and really make an impact.

UKSC
UK SHORT
COURSES

Career Stream Courses

Gain experience and insight to launch your future.

Course Aims:

For our Career Stream courses, we design programmes that help students gain meaningful pre-university experience in fields where universities or employers either expect, strongly recommend, or highly value evidence of commitment beyond academic grades.

Many competitive opportunities expect applicants to demonstrate sustained engagement with the profession and the most competitive often look for “proof of motivation”.

Career Streams:

Pre-Vet
Pre-Medic
Performance Engineer
International Banking & Finance

15+ Age range C1 English level

- Expert -led tuition in theory and practicals
- Real-world profession related field trips.
- University application prep & interviews
- Co-curricular activities, sports and socials
- Formal Dinners, speakers & assemblies
- Cultural excursions to great UK locations.

A powerful combination of expert-led tuition and real-world experience hours.

“Universities and top employers receive thousands of applications from students with almost identical grades. They’re increasingly asking:

What have you actually done to explore this profession?”

That is exactly where a vocational summer school academy can add value. Our Career Stream courses will help students to answer that question resoundingly – evidencing knowledge, experience and personal growth.

Career Stream Format

Gain experience and insight to launch your future.

UK SHORT COURSES

Subject Stream

UKSC
UK SHORT
COURSES

Subject Stream Courses

Explore subject specialisms with Rugby School Teachers.

Course Aims:

We believe that education should focus on the development of the whole person. That means that time with us on a Subject Stream course is not purely focussed on academics, but also on character education giving opportunities to build confidence, curiosity and team spirit.

In addition, our students want courses serve as a “stepping stone” experience, should they be considering full time education in the UK or abroad, with the chance to get a true taste of life at a UK boarding school.

Subject Streams:

Combined Sciences
Music & Performance Art
Business & Economics

13+ Age range
B2 English level

- Subject course taught by Rugby School Teachers
- Subject-linked field trips.
- University application prep & interviews
- Co-curricular activities, sports and socials
- Formal Dinners, speakers & assemblies
- Cultural excursions to great UK locations.

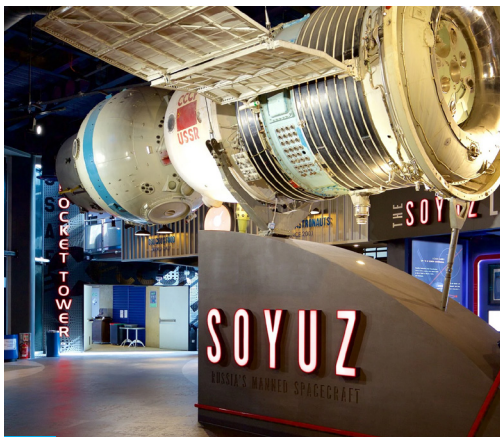

Authentic Rugby School teaching and acclimatisation to life as a boarding student at a top UK school.

“With inspiring courses created and delivered by Rugby School Teachers, our students may end the course by leaving Rugby, but the spirit of Rugby should never leave them!”

To this end, we’ve created an exciting set of Rugby School Short Courses (RSSC) subject course options, to develop and enrich a student’s subject interest, and acclimatise them to this style of education.

Subject Stream Format

SHORT COURSES

Course Locations:

Rugby School has enjoyed hosting summer school for international students for many years. With Rugby School Short Courses we are offering high quality content-rich courses that extend beyond the regular summer school experience. Based in School House, one of our oldest buildings in the heart of the campus, the students will enjoy a busy programme of classroom learning from excellent specialist teachers; high-level sports coaching using our magnificent indoor and outdoor facilities; and the kind of academic and cultural enrichment that comes from cross-curricular teaching, off-site activities and excursions. They will also experience the fun of boarding and the chance to make friends and extend their boundaries in a truly Rugbeian atmosphere of tolerance, respect and intellectual curiosity.

RUGBY SCHOOL
SHORT COURSES

Dr Stephen Belding

Director Of Academic Programmes, RSSC

Dr Stephen Belding is Programme Director for Rugby School Short Courses and Director of Academic Programmes for Rugby School Global Partnerships.

An experienced educator and former Head of Chemistry at Rugby School, he holds an MChem and a DPhil in Chemistry from the University of Oxford, as well as a Master's from the University of Buckingham, where his research focused on school inspection reports and the drivers of excellence in schools.

Business & Economics Course content:

A programme of co-curricular afternoon activities, projects, visits and sport supports all subject streams.

So, you're
learning English ...

EAL Stream

UKSC
UK SHORT
COURSES

EAL Stream Courses

Discover Britain and build confidence with English.

Course Aims:

Confidence, communication and culture!
Discovering Britain is an enquiry-based programme which is the basis of the EAL module for A1-B1 learners. Rather than focusing on grammar alone, the programme encourages students to notice, describe, compare and communicate. Lessons make use of experiences both inside and outside the classroom and provide meaningful opportunities to develop speaking, listening, reading and vocabulary in authentic contexts.

EAL
Stream:
Exploring British Culture

11+ Age range
A1-B1 English level

- English lessons taught by EAL Teachers
- Co-curricular activities, sports and socials
- Formal Dinners, speakers & assemblies
- Cultural excursions to great UK locations.

Enquiry-led learning and English language development with British culture at its heart.

The programme is built around a single overarching enquiry:

“What have I discovered about Britain?”

The ambition is that, by the end of the programme, students will feel more confident using English to talk about their experiences in Britain, compare aspects of life in Britain with those in their own country, and share information about the people, places and activities that have made their visit memorable.

There are two variations of premium EAL course, a Rugby School Short Courses Version and a second version at St Pauls School, London. Please review both sample programmes on the following pages.
